There is nothing like watching how its done right? At Tolarus we have produced 15 **'How To Videos'**, that are optimised to play on mobile phones or on your tablet/pc, so you can stop and start the video step by step. Just go to the website above a choose Tolarus Training, and discover our 15 videos to get you up and running and printing those labels.

INTRODUCTION
* Please confirm with your I.T. department (where appropriate) that the server software has been installed, and ideally, have the server ready for the end of the Client installation process.

Whilst these are the minimum specifications required to run Nutrilabel, Tolarus® recommend investing in the best technology you can, in order to get the very best from our software.

Please check that your systems can implement and support Microsoft .Net Frameworks. If in doubt, please contact your Distributor for Technical Advice.

SYSTEM REQUIREMENTS: Shown here are the minimum and recommended system requirements needed to run Nutrilabel Client efficiently. Please don't install the software onto any computer that is not equipped with the mnimium specifications. Please note Tolarus does not run on MacOS

Minimum System Requirements:

Operating System	Microsoft Windows 8, 8.1, 10, Server 2012 or newer. Operating System must be 64 Bit.
Processor	Intel Core i3 3.0 Ghz Dual Core
Memory	4GB RAM
Storage	5GB Available Hard Drive space

Recommended System Requirements:

Operating System	Microsoft Windows 8, 8.1, 10, Server 2012 or newer. Operating System must be 64 Bit.
Processor	Intel Core i5 3.0 Ghz Dual Core
Memory	8GB RAM
Storage	5GB Available Hard Drive space on a Solid-State Drive.

Essential System Prerequisites:

	Microsoft .Net Framework 3.
	Microsoft .Net Framework 4.7

Settings
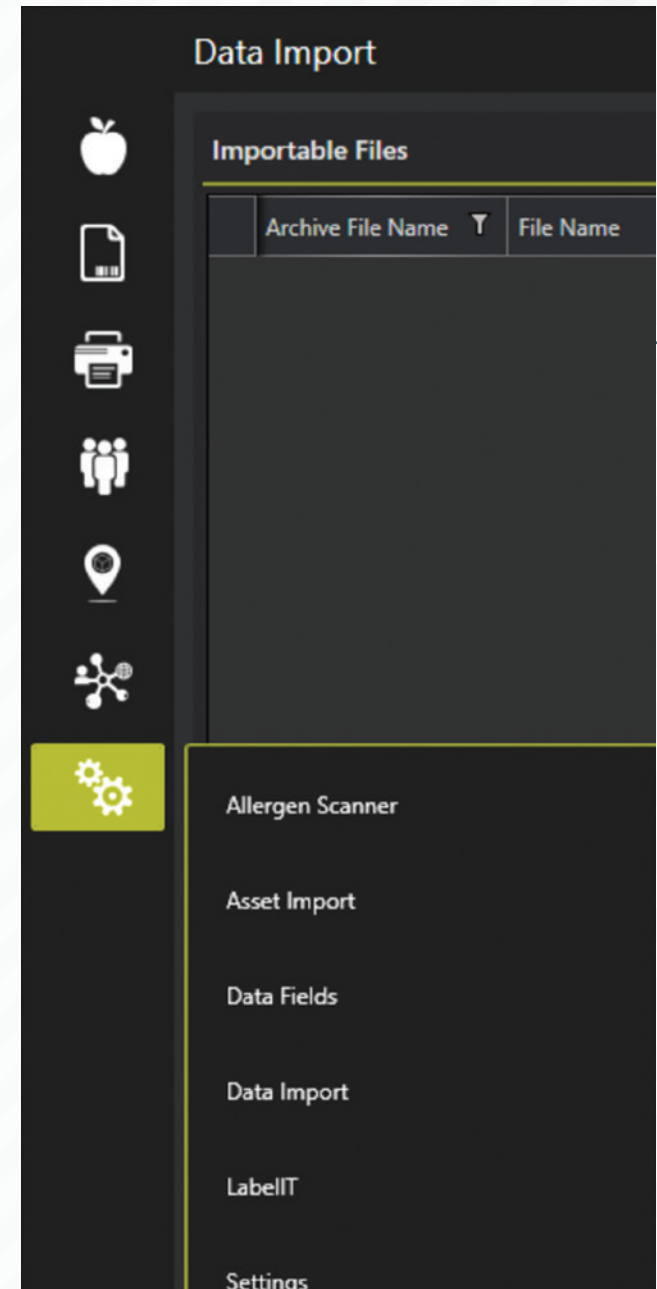

ALLERGEN SCANNER

THE ALLERGEN SCANNER: is the most important part of the software, it will contain all of the allergens that the software will search for, you are able to add new allergens here, and also to add names of ingredients to an exclusion list so that they won't appear as an allergen.

To get to the allergen scanner screen, click on the allergen scanner tab, this will take you into a new screen, as displayed below.
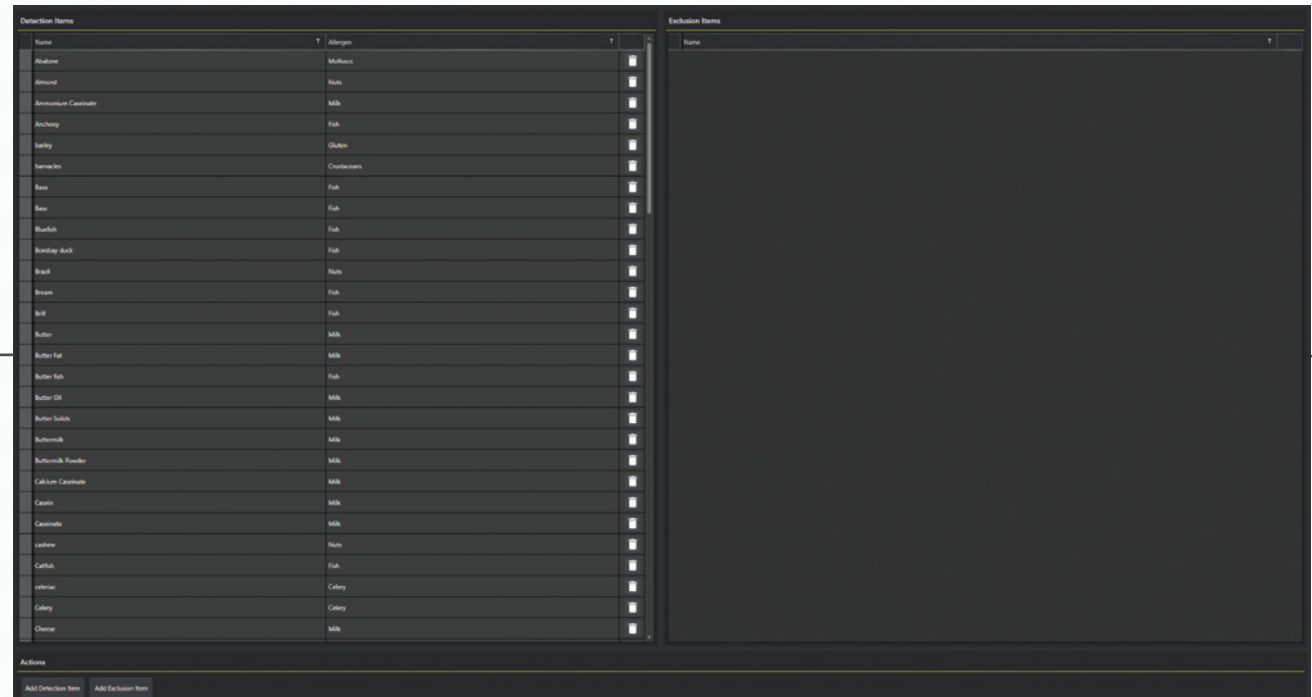

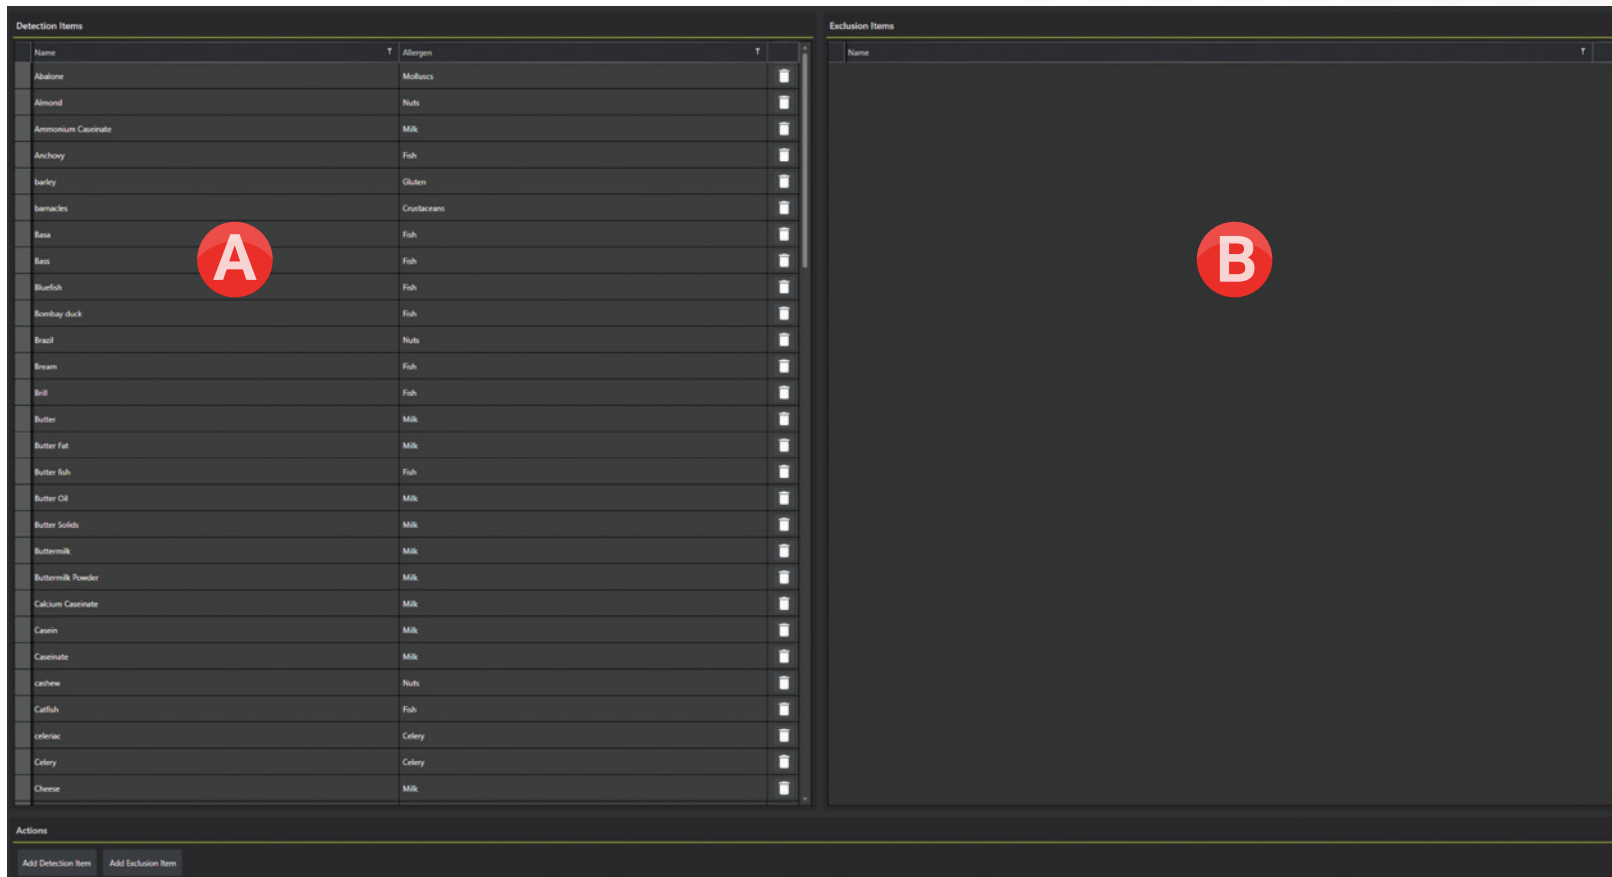

On the left, **A** you have all of the detection items that the software is looking for, and on the right, you have exclusion items. To add a new item to the Detection Items, click **'Add Detection Items'** this will pop-up a small box in which you can enter text to be matched to an allergen, you could, for example, enter wheat here and then choose gluten in the drop-down, then click confirm.

This would then mean that the software will look for this and highlight it as an allergen. To add an exclusion item, **B** click the **'Add Exclusion item'** button, this will give you a data field where you can add text to stop the software from highlighting it as an allergen.

DATA FIELDS

DATA FIELDS: Data Fields is the area in which the ID's of Bar-codes and Images are kept, these can also be added in the product menu.

To add these, **Click the 'Add'** button you will then be able to choose whether to create a bar-code or a image ID with a drop-down

You can then **Click Confirm** Ⓒ and the ID is then added to the software, which can then be used at a product level.file explorer, simply find the file that you want to add and **Click Open**, this will save it to the software for use in the label designer.

* You will need to give a name to either the bar-code or image ID.
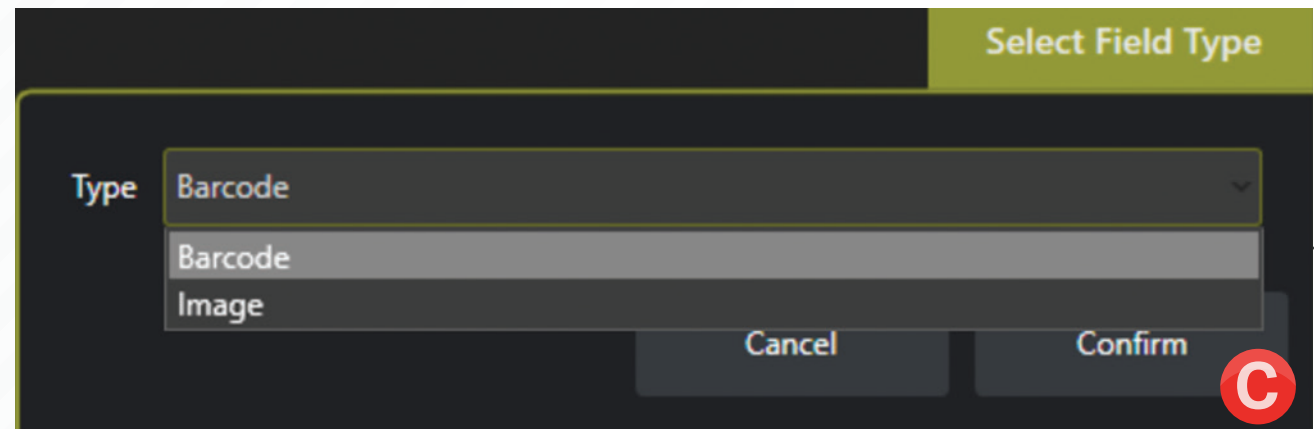

DATA IMPORT

THE DATA IMPORT SCREEN: will allow you to import data in any file format, simply drag and drop the file that you want to. This allows you to save specific files in Tolarus.
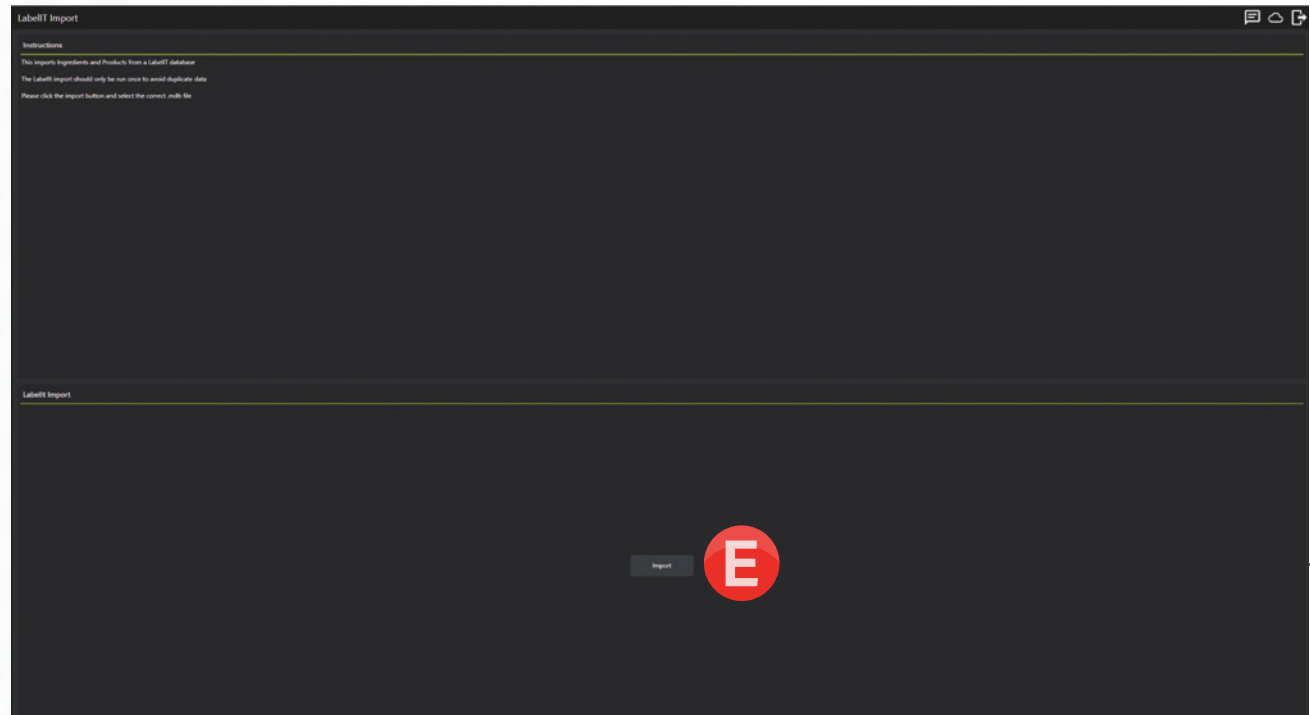

In this window, add into the '**Drop Files Here**' section. **Ⓓ**

LABELIT

UPGRADING TO TOLARUS: The Labelit screen will allow you to import data from our old labelling software, Labelit.

To start, **Click the import button** ⒺE and select the **.mdb file** you want to use. Keep in mind that once this is done, you are not able to do it again.

SETTINGS & SOCIAL MEDIA

The Settings screen will allow you to change some of the basic settings within Tolarus.

F **The Name of your Company:** this is where you enter the name of your company.

G **Pause on Customer Change:** This will pause the print queue if the customer assigned changes

H **Pause on Label Change:** This will pause the print queue if the Label design is changed

I **Pause on Product change:** This will pause the print queue if the product changes.

SOCIAL MEDIA:

Here you can input your social media which can be added to your label designs.

*All the 'pause on' options come into play in the Printing guides.
